المستودعات الرقمية؟؟؟

وسيلة

لإدارة

وتخزين

وتوفير سبل الوصول إلى

المحتوى الرقمي من المعلومات

الهدف من المستودعات الرقمية المؤسسية

1. خلق رؤية عالمية للبحوث العلمية في المؤسسة.
2. تخزين مصادر المعلومات والحفاظ عليها، بما في ذلك المصادر غير المنشورة.
3. المحافظة على المصادر النادرة والسريعة التلف من دون حجب الوصول إليها.
4. سهولة الاستخدام.
5. النشر الإلكتروني.

وظائف المستودعات الرقمية

1. إيداع المواد
 2. التحكم في الوصول الى المعلومات
 3. دعم البحث والاسترجاع
 4. الحفظ والتخزين

Overview

Use of HbA1c to diagnose type 2 diabetes Mellitus. Gestational diabetes and adverse pregnancy outcome is under investigation. Type 2 diabetes in children will be investigated in schools. A platform will be developed to follow up risk factors like obesity, lack of exercise, unhealthy food and genetics. The program will highlight the risk factors for each students to be used by parents, Ministry of Education, Ministry of Health and School administration to overcome these risk factors and to treat those who developed diabetes.

Background: There is an increasing trend towards consumption of complementary and alternative herbal products in many parts of the world. **Objectives:** The purpose of this study was to investigate the knowledge and attitudes among pharmacists in West Bank, Palestine towards the use of herbs. **Methods:** Self-administered questionnaire was designed as the study instrument and distributed among 350 qualified pharmacists working in government and private pharmacies in West Bank, Palestine. **Results:** The response rate was 82.9% (290/350). The mean age of the pharmacists was 32.9 (SD=6.5) years. The majority of the pharmacist 238 (82.1%) worked in the community pharmacies and their experience in practice ranged from 1 to 26 years. Product package instructions and product representative were the most consulted by the pharmacists (128; 44.2% and 73; 25.2% respectively). General health tonic preparations were the most widely dispensed drugs (142; 48.9%), followed by cough preparations (55; 19.0%) and slimming agents (64; 22.1%). The Majority of pharmacists (195; 67.2%) believed herbal remedies were effective; however, about fifty percent of the pharmacists had concern about their safety. The knowledge of respondents about the indications of herbal medicine was good, but their awareness of interactions, contraindications and adverse effects was inadequate. The majority of Pharmacists (255; 87.9%) believed that herbal product should undergo increased regulation and (215; 74.9%) believed that information available about herbal and natural product isn't adequate.
