The reflections of the internal Palestinian division (2007) on the coverage of the Jerusalem issues by the Palestinian dailies (2006-2009)

Prepared by: Abdel Salam Alkhater

Supervisor: Farid Abu Adheir.

Abstract

This study aims to identify the reflections of the internal Palestinian division on the coverage of the Jerusalem issues in the Palestinian daily written press (Al-Quds, Al-Hayah Al-Jadeedah, and Filisteen) newspapers, and to determine the degree of interest in each issue, the sides that are interested in these issues, and the sources on which these newspapers depended in their coverage, the press shapes/formats used in coverage, and the reflection of division on these issues.

Furthermore, this study aims to present scenarios and recommendation that are based on scientific research, to further develop the performance of Palestinian Press as it is one of the pillars safeguarding the Jerusalem status at the heart of struggle against Israeli occupation.

The study focused on the period extending from 2006 to 2009, during which the Palestinian arena witnessed the events of internal fighting that led to division and estrangement, in addition to what the occupation authorities did in the city of Jerusalem during the study period such as the escalation procedures of Judaization, intensification of settlement construction, demolition and confiscation of homes, and restrictions imposed on the Jerusalem population.

In this study, the researcher attempted to uncover the nature and direction of the relationship between the state of the Palestinian political division on one hand and its impact on the presence of the Jerusalem issue in Palestinian daily press.

On this basis, the study aims to answer the researcher's main question: "How did the internal Palestinian division affect the media coverage of the issue of Jerusalem". The study was based on the examination of the fundamental assumption that there is an inverse relationship between division and coverage of Palestinian newspapers to Jerusalem on the other.

The researcher used the field survey method in this study, and in this approach he included the use of quantitative content analysis method that aims to translate content into numbers, ratios, and occurrences.

The study concluded with a set of results, the most important among which are:

That the size of the press coverage to the issues of Jerusalem has increased during and after the division. That the Sports affairs represented most of the issues that Al-Quds Newspaper was concerned for the period of study. The social, the health, and the educational affairs were the most issues that Al-Hayah Al-Jadeedah Newspaper was concerned with before, during, and after the division. While the settlement issue, the Wall issue, the confiscation of land, and the Judaization of the city, represented the most issues which Filisteen Newspaper focused on.

The study also showed that the news nature dominated the newspapers handling of the issues of Jerusalem. The study also demonstrated that Al-Quds and Filisteen newspapers depended on reporters more than other sources. throughout the study period. Meanwhile, Al-Hayah Al-Jadeedah Newspaper depended on the local news agencies. The majority of the issues of Jerusalem before, during, and after the division have been published on the inside pages of the newspapers of study.

The results of study also showed that Al-Quds Newspaper was the most one that reserved areas on its pages for the coverage of Jerusalem issues before, during and after the division. It was also showed that the Palestinian authorities, bodies, and national figures were the most whose activities and concerns were covered, especially in the West Bank newspapers (Al-Quds and Al-Hayah Al-Jadeedah) before, during, and after the division. Meanwhile, the activities and concerns of the government departments were covered in Filisteen Newspaper. Additionally, the extended title came on top of the highlighting elements used by Palestinian newspapers, meanwhile these newspapers did not use the element of headline news throughout the study period.

The researcher concluded his study with a number of recommendations aimed to serve the issues of Jerusalem. These recommendations are directed to the Palestinian newspapers to take care of all the issues of Jerusalem and not to give priority to less significant matters, such as sports news, over matters of greater importance.

The researcher also recommends that Palestinian newspapers should maintain a balance between their duties of providing news versus those of providing interpretive and educational services for the Palestinian public. This should be done in a way such that the address will not only be focusing on the news. He also recommends for the Palestinian press to depend more on professional and permanent reporters stationed in the city of Jerusalem to provide the Palestinian newspapers with what is going on in the holy city.
