Adverse Events Following Immunization (AEFI)

BCG vaccination, and
post BCG complications
among Palestinian infants and children
in the Gaza Strip, 1999

By:

Riyad Abed El Kareem Awad

Supervisor:

Professor Dr. Yehia Abed, PhD

Dean of Palestinian School of Public Health

Advisor:

Dr. Abed El-Jabar Tibi, MPH

General Director of PHC-MOH

Thesis Submitted in Partial Fulfillment of the requirement for
the Degree of Master of Public Health at Al-Quds University

Expected date: September 1999

ENDORSEMENT

THESIS TITLE:

Adverse Events following Immunization (AEFI)
BCG vaccination, and post BCG vaccine complications among Palestinian
infants and children in the Gaza Strip, 1999

Dedication

*I would like to dedicate this work to my wife,
my five lovely children and to all Palestinian
children.*

Acknowledgement

I would like to thank his Excellency Minister of health Dr. Riyad Al Zanoun, Director General of the MOH Dr. Imad Tarwea, and Professor Dr. Sari Nuseabh President of Al Quds University for their caring and help in starting Master of Public Health program. I would like to acknowledge my supervisor, Professor Dr. Yehia Abed, Dean of the school of public Health for his help, support, guidance and valuable remarks. It is hard work and staff enthusiasm that made this opportunity of starting this MPH program and building the first stone of Palestinian school of public health. I am grateful for the guidance and tremendous support of Dr. Tebbi D.G of PHC and my advisor for his contribution to this study. My thanks are extended for all my tutors, facilitators, and colleagues in the school.

Great thank for our Palestinian friend Dr. Richard Robberts, consultant epidemiologist in Wales for his time and help in review, editing, and comment on this study through E-mail, I will not forget his contribution.

Special thanks for Dr. John M. Cowden, Consultant epidemiologist who I met in Athens during my training with European Program for Intervention Epidemiology and training (EPIET), who made time in his busy schedule to review, editing and comment on my research, I will not forget his valuable remarks. My great thanks for Dr. Najeeb Al Shorbaji, Regional Information Officer at WHO/EMRO Office for his guidance and provision of references. I would like to thank Daniel

Swift, student at literature at University of Oxford who I met at Gaza Community Mental health program for editing.

I wish to express my appreciation and gratitude to all colleagues and partners who have contributed to the production of this document. Special thanks are extended to my colleagues in PHC directorate, school of public health, Gaza Health Research and Services Center (GHRSC), preventive medicine department and its director Dr. Ali Queder, epidemiology department and School Health Directorate for their time, expertise and dedication to help me to finalize this research. Of course the great of entire team and staff members of school of public health especially Shaban Murtajah, Zena EINajar, Nawal El Wali, Asmahan, and Jihad are highly acknowledged. . I would like to thank MIS department staff and its director Dr. Jamal Kefafi and especial thanks for Mr. Mohammed Keshta for their help, also my gratitude extended to Mr. Naser Aoushah computer manager for his preparing computer program on Microsoft Access.

I extend gratitude and thanks for Ms Nedae Temraz, statistician, Dr. Suzan Shushah, and Mr. Mazen skeik, MIS expert, for their remarks and help in computer and analysis

My great thanks are extended to Nursing office especially, Mr. Jihad Ahmed, EPI manager, the district staff nurses, Jameal Al Masery, Asaed Mater, Sami Ali, Mohammed Al Haj Yousef, Ali Al Aedi, Suad Abu Jame, and Ibrahem Al Azizi. Team and staff nurses in School Health Directorate in addition to all

nurses and staff nurses in government and UNRWA health provider whose enthusiastic and dynamic participation made this work successful.

I would like to thank UNRWA health staff and managers especially Dr. Ayoub Al Alem Chief of UNRWA health Office, who gave me the opportunity to visit UNRWA health centers with easy and comfortable, Dr. Hemade Abu mousa, Dr. Amna Shurbasi, Dr. Abed Al Naser Abu Jaser and Dr. Naser Ahmed, Chest Diseases Specialist who provided me with the most BCG cases reported at UNRWA health centers; I will not forget his spirit and help. I don't forget the appreciation and welcoming of physicians and nurses at all UNRWA health centers. I extend gratitude to Dr. Rafeq Al Zanon, Director of Gaza WHO Office and Mr. Walid Shakoura, International Cooperation Directorate in MOH for their help and support. I would like to thank Mr. Mahmoud Al Dahma for editing the questionnaire and Dr. Abed Al Rahman Bargawi, D.G. Deputy of MOH for help in reading and editing this document.

I would like to thank all those who are non-mentioned and made this document possible.

Serial No.	Subject	Page No
Chapter I		
Introduction		
1.1	Statement of the problem	1
1.2	Assumptions	3
1.3	Goal	3
1.4	Aims	4
1.5	Objectives	4
1.6	Summary	5
Chapter II		
Demographic overview		
1.	Demographic overview	6
1.1	Introduction	6
1.2	Demographic trends	8
1.2.1	Population	8
	a. Population size	8
	b. Population Density	9
	c. Population Growth	10
1.2.2	Births	10
	Crude birth rate	10
2.	Socioeconomic Development	10
3.	Environment situation	11
3.1	Housing and Overcrowding	12
3.2	Water	12
4.	Health	13
4.1	Primary Health care	13
4.2	Child Health Services	15

4.3	Diseases Surveillance	16
4.3.1	Infectious diseases surveillance	17
4.3.2	Tuberculosis surveillance	18

Chapter III

Literature review

3.1	Introduction	19
3.2	Epidemiology of tuberculosis	19
3.2.1	Global epidemiology of tuberculosis	19
3.2.2	Tuberculosis in Mediterranean Region	22
3.2.3	Tuberculosis in Palestine	23
3.2.3a	Tuberculosis in the Gaza Strip	25
3.3	Expanded program on immunization	26
3.3.1	Introduction	26
3.3.2	Global Expanded program on immunization (EPI)	27
3.3.2 a	Infants immunized against six traditional EPI diseases	29
3.3.2.b	The situation 20 years ago	30
3.3.2.c	General successes in immunization programs	30
3.3.3	Palestinian Expanded program of immunization	32
3.3.4	School health program	36
3.3.5	Immunization coverage	37
3.4	BCG vaccine	37
3.5	BCG vaccine policies	38
3.5.1	Global BCG-vaccine policies	38
3.5.2	EMR BCG vaccine policies and coverage	39
3.5.3	BCG vaccine policy in Palestine	39
3.6	Efficacy of BCG vaccine	40
3.7	Age to vaccinate	44
3.8	Skin Testing after vaccination	45
3.9	Vaccine quality assurance	47
3.9.1	A network to "eradicate" poor-quality vaccines	48
3.9.2	Suppliers of vaccines "pre-qualified" by the VSQ	48

3.10	Post marking surveillance	49
3.10.1	Adverse Events following different vaccine antigens	51
3.11	BCG vaccine safety	53
3.11.1	Adverse reactions in newborn children	56
3.11.1.a	Regional suppurative adenitis (suppurative lymphadenitis)	56
3.11.1.b	Osteitis	59
3.11.1.c	Host characteristics and adverse reactions	60
3.11.2	BCG complications in Palestine	61
3.12	WHO recommendations	63
3.12.1	For BCG vaccination and revaccination	63
3.12.2	For children	64
3.12.3	For health care workers	65
3.13	New BCG vaccines	65
3.14	Vaccine cost	66
4	Birth registration within the frame work of MIS	68

Chapter IV

Conceptual framework

4.1	Desired outcomes	69
4.2	Undesired outcomes	70
4.3	Summary	71

Chapter V

Methodology

5.1	Research design	72
5.2	Identification of the study population	72
5.3	Setting	74
5.4	Study variables	74
5.4.1	Operational definitions for the study variables	75
5.5	Instruments	77

5.6	Data collection	78
5.6.1	At epidemiology department	78
5.6.2	At MCH centers	80
5.7	Data coding and entry	80
5.8	Data analysis	80
5.9	Ethical considerations	81
5.10	Study limitations	81
5.11	Study bias	82
5.12	Pilot testing	82

Chapter VI

Results

I	BCG vaccine coverage	83
1.1	BCG vaccine coverage among infants in the Gaza Strip, 1997 and 1998	83
1.2	Age of BCG vaccination	85
1.3	BCG vaccine coverage among school children in the Gaza strip, in scholastic year 1997-1998	85
II	Post BCG complications	86
2.1	Distribution of post BCG vaccine complications among infants in the Gaza Strip by months in 1997 and 1998	86
2.2	Sources of reporting for post BCG complications among infants in the Gaza Strip 1997	88
2.3	Distribution of post BCG vaccine complications rate in different age at BCG vaccination	89
2.4	Annual rate of post BCG vaccine complications among infants in the Gaza Strip	90
2.5	Rate of post BCG vaccine complications among infants in the Gaza Strip by health care provider, 1997.	91
2.6	Distribution of complications among infants in the Gaza Strip by district, 1997.	92
2.7	Rate of post BCG vaccine complications among vaccinated infants	95

	in different health clinics in the Gaza Strip, 1997.	
2.8	Rate of post BCG vaccine complications among vaccinated infants in the Gaza Strip by health clinic and district, 1997.	98
2.9	Distribution of post BCG vaccine complications among infants in the Gaza Strip by gender, 1997.	101
2.10	Distribution of different type of post BCG vaccine complications among infants in the Gaza Strip, 1997.	103
2.11	Distribution of post BCG vaccine complications among infants in the Gaza Strip by birth weight, 1997.	104
2.12	Average time period between BCG vaccination and date of notification among post BCG complication cases in the Gaza Strip, 1997	105
2.13	Rate of post BCG vaccine complications among infants due to different BCG vaccine batch numbers used in the Gaza Strip, 1997	105
2.14	Rate of complications for different BCG batch number by health care provider in the Gaza Strip, 1997	108
III	BCG vaccine distribution and wastage.	109
3.1	Distribution and wastage of different BCG vaccine batch number used for infant's immunization by health care provider.	109
IV	BCG and school children	110
4.1	Distribution of post BCG vaccine complications among first grade school children in the Gaza strip, scholastic year 1997-1998.	110
4.2	Quantity and batch number of BCG vaccine used for first grade school children vaccination in the Gaza Strip in the scholastic year 1997-1998.	112
V	Knowledge and practices of nurses regarding BCG vaccine and vaccination, 1998.	114
5.1	Characteristic of manpower	114
5.2	BCG technique and administration	116
	a. Knowledge of BCG technique and administration	116
	b. Practice on BCG technique and administration.	118
5.3	BCG vaccine contraindications	120
5.4	Efficacy of BCG vaccine	122

5.5	BCG vaccine storage and cold chain	123
5.6	BCG vaccine complications, health education and reporting.	125
VI	Evaluation of birth weight registration within MIS department.	127

Chapter VII 129

Discussion

Characteristics of the study population.	132
Reviewing of immunization schedule	133
Observation during infants BCG vaccination session.	134
BCG vaccine coverage and tuberculosis	135
Efficacy of BCG vaccine	139
Vaccine sources and cost	140
Vaccine storage	142
BCG vaccine distribution and wastage	144
Vaccine contraindications	146
Adverse Events Following Immunization	146
Post BCG vaccine Complications	147
BCG vaccine complications at different health services.	149
Risk factors associated with BCG complications:	151
1. BCG strain	151
2. BCG dose and administration technique	153
3. Host characteristics:	154
a. Age	154
b. Weight of the new born	157
c. Immune status	158
Effect of environment and life style on BCG lymphadenitis	159
Surveillance system	160
a. Reporting of post BCG complications	160
b. Validation of birth weight within MIS	161

List of tables

• BCG immunization coverage for first class in governmental primary school, 1994-1998	36
• Number of deliveries by district in the Gaza Strip, 1997 and 1998	83
• Number of BCG vaccinated infants by district in the Gaza Strip in 1997 and 1998	84
• BCG vaccine coverage among infants by district in the Gaza Strip, 1997-1998	84
• BCG vaccine coverage among school children by health care provider in the Gaza Strip in the scholastic year, 1997-1998	85
• Distribution of Complications rate in different ages at BCG vaccination	89
• Distribution of Complications in different ages at BCG vaccination	90
• Rate of complications among infants in the Gaza Strip by year.	90
• Distribution of post BCG complications among infants by health provider in the Gaza Strip, 1997	91
• Distribution of post BCG complications among infants by district in the Gaza Strip, 1997	93
• Distribution of complications among infants by gender, 1997	101
• Distribution of complications among infants by birth weight, 1997	104
• Average time period between vaccination and date of notification among infants with BCG complications in the Gaza Strip, 1997	105
• Rate of complications for different batch numbers used, 1997.	106
• Rate of complications among infants for different BCG batches by health care provider, 1997	108

• Percentage of BCG vaccine wastage by health care provider, 1997	110
• Post BCG vaccine complications rate among first grade school children in the Gaza Strip 1997-1998	111
• Quantity and batch number of BCG vaccine used for first grade school-children vaccination in the Gaza Strip in the scholastic year 1997-1998	113
• Percentage of BCG vaccine wastage used for school children and by health care provider, 1997	113
• Distribution of manpower regarding BCG vaccination in the Gaza Strip by health care provider, 1998	115
• Knowledge of nurses regarding BCG vaccine technique and administration at different health cares providers.	117
• Practices of nurses regarding BCG vaccine technique and administration at different health care provider.	119
• Knowledge of nurses regarding BCG vaccine contraindications at different health care providers, 1998.	121
• Knowledge of nurses regarding BCG vaccine efficacy against all types of TB at different health care providers, 1998.	122
• Knowledge of nurses regarding BCG vaccine cold chains at different health cares providers.	124
• Knowledge and practice of nurses regarding post BCG vaccine complications at different health care providers, 1998.	126
• Comparison between infants birth weight registered in birth records at MCH and MOH-MIS records.	127
• Comparison between infants birth weight registered at birth records at MCH and MOH-MIS records by district.	128
