External Examiner

... 17/18

Dedication

*I would like to dedicate this master thesis to my father
and mother, to my husband , Dr. Fayes Abu Alya for his
help and support in carrying out this master thesis ,
and to my children Abd Al Latif , Walda' and Layan.*

Acknowledgements

I would like to thank the Ministry of Health. I would like to thank Dr. Munther Sharif, deputy Minister of Health, and Dr. Nadeem Tubasi, the general director of Primary Health Care . Special thanks goes to Dr. Said Hanoon, the director of Tulkarm Department of Health, who gave me the chance to get the master and provided me support in carrying out this master thesis.

I would like to thank the Women's Health Department, special thanks goes to Miss's Wejdan Siam and Dr. Suzan Abdo, and to the staff who helped me in carrying out this thesis.

I would like to thank the Director of Rafydia Hospital, and the staff who work in the postnatal section.

Special thanks to my advisors Dr. Muhammad Shahin and Dr. Sana shadeed.

At the faculty of public health, al Quds University, I would like to thank all the staff for their support.

Buthinah Khalid.

Table of Contents

Chapter 1	30
1.1 Introduction	1
1.2 Statement of the Problem	2
1.3 Significance and Background of the Study	2
1.4 Justification and Importance of the Proposed Study	5
1.5 Objectives	6
Chapter 2	
Review of Relevant Literature	7
Chapter 3	
3.1 Frame Work	18
3.2 Definition of the Major Variables	19
3.2.1 Independent Variables	19
3.2.2 Dependent Variables	20
3.2.3 Background Variables	21
3.3 Methodology	24
3.3.1 Data Collection	24
3.3.2 Sampling	24
3.3.3 The Design	26
3.3.4 Analysis	27

3.3.5 Time Framework	28
3.3.6 Limitations of the Study	29
Chapter 4	
4.1 Demographic Characteristics of the Study Population	30
4.1.1 Place of Residence	30
4.1.2 Age	30
4.2 Socio-economic Characteristics of the Sample	33
4.2.1 Education	33
4.2.2 Age at First Marriage	36
4.2.3 Occupation	38
4.3 Variables Related to the Health Status of Women	38
4.3.1 The Type of Last Delivery	38
4.3.2 Number of Total Pregnancies	38
4.3.3 Number of Abortions	39
4.3.4 Number of Stillbirths	40
4.3.5 Clinics where Women Visited During Pregnancy	41
4.4 Counseling	42
4.4.1 Post Delivery Counseling in Rafidya Hospital	42
4.4.2 The Duration of Post Delivery Counseling in Minutes	43
4.4.3 Counseling Topics	44
4.4.4 Satisfaction of Clients	45
4.5 Relations Between Counseling and Background Variable	47

4.6	Effect of Counseling on Women's Family Planning Practices	60
4.6.1	Effect of Counseling on Using Contraceptives after the Last Delivery	60
4.6.2	Effect of Counseling On the Continuity of contraceptives Usage	62
4.6.3	Effect of Counseling on Postnatal Care	63
4.7	Additional Counseling	65
4.7.1	Effect of Counseling Outside the Hospital on using Contraceptives after the Last Delivery	65
4.7.2	Effect of Counseling Outside the Hospital on the Continuity of Using Contraceptives	66
4.7.3	Effect of Counseling Outside the Hospital on Postnatal Care	68
4.8	Family Planning	69
4.8.1	Having Enough Information about Family Planning before the last Delivery	69
4.8.2	Using Contraceptives before the Last Delivery	69
4.8.3	Using Contraceptives After the Last Delivery	70
4.9	Effect of Background variables on Family Planning Practices	72
4.9.1	Residence	72
4.9.2	Education of Women	73
4.9.3	Education of Men	75
4.9.4	Age of Women	76

4.9.5 Age of Men	77
4.9.6 Age of Women at Marriage	78
4.9.7 Work of Women	79
4.9.8 Work of Men	80
4.9.9 The Type of Last Delivery	81
4.9.10 Number of Pregnancies	82
4.9.11 Number of Male Children	82
4.9.12 Number of Female Children	84
4.9.13 Number of Abortions	85
4.9.14 Having Stillbirths	86
Chapter 5	
5.1 Discussion and Conclusions	87
5.1.1 Characteristics of the Sample	88
5.1.2 Effect of Counseling on Women's Family Planning Practices	90
5.1.3 Effect of Background Variables on Women's Family Planning Practices	96
5.2 Conclusions	102
5.3 Recommendations of the Study	103
Annex 1	104
Annex 2	109
References	112
