

## **ABSTRACT**

Both the Qur'an and Hadith prove the signs or tokens of the lesser Day of Judgement. This will strengthen the meaning of faith in us . Since faith activates the conscious and gives us Tahdhib (moral education) . It also directs our behavior toward good things. This will be the result of applying Islam on our life.

The Qur'an and Hadith include lots of portents and prophecies to us. They tell us that the future is for Islam and Islamic nation (ommah). This will lead to the spread of real security, justice and good standard of living . This happened in the past , but nowadays Islamic nation or (ommah) is experiencing a bad time.

My Study aims to answer these two questions . which represent the problem of the study . first, what is the relation between the signs of the lesser Day of Judgement and the future of cultural conflict in Palestine? Secondly , how will Palestine be after these catastrophic events?

The Study aims to reinforce the portents and prophecies that the Islamic nation will return to lead the world again . This will generate the feeling of optimism among us as Palestinians and as Muslims, too .

This current study dictated the use of several types of research such as the deductive , analytical and comparative methodologies .

The subject of my study also covered the explanation (tafseer) of the Qur'anic verses (ayyat) which talk about ( Bani Israel ) in addition to all Hadith that talk about the Day of Judgement and the future of Islamic culture in Palestine . The place in my study

includes the land which our Prophet Muhammad (peace be upon him) had seen . Its roots spread from his time of being Prophet to the time of Yajoj waMa'joj in Bait Alamkds (Jerusalem) .

Among the most important results of this research were the Islamic nation (ommah) will be the victorious in the future because it carries the right to all nations of the world . Although the nowadays conditions or situation is far away from this .

The study reccommends scientists, preachers and researchers, who study the Subject of disturbances (fitan) and the signs or trokens of

the Day of Judgement to follow the approach used by our Prophet Muhammad (peace be upon him) as well as the application of Islamic rules (sharia') Also I advise universities and research centres to consider the importance of Jerusalem (Bait Alamkds) as a holy place and to spread this importance in their mass media.
